PhNo:+917981964252 |Email:malothashweetha@gmail.com |Location:bhadradrikothagudem
|Linkedin: Ashweetha Maloth |Github: Malothashweetha

EDUCATION AND CERTIFICATION

Bachelor's of technology | Mallareddy Demeed to be University | CSE	2023-2027
Intermediate ,MPC | TTWRJC Ankampalem , Kothagudem	2021-2023
Secondary board | TSTW RES School of Excellence , Khammam	2020-2021

TECHNICAL SKILLS

Python programmer | front-end developer | power-BI | GIT

WORK EXPERIENCE

Python Developer| Cognifyz Technologies   may 2025- July 2025
- Developed and deployed python-based applications as a part of the internship ,projects ,focusing on clean, modular , and reusable code
- Completed a hands-on internship as a python developer ,gaining experience in real-time software development projects

Junior developer | skilltimate   June 2024- September 2024
- Utilized NUMPY to handle large numerical datasets
- Analyzed sales trends using pandas to clean and process data
- Created visualization with matplotlib to present insights to stakeholders
- Created a dynamic sales dashboard using matplotlib to visualize monthly and quarterly sales trends
- Built trend lines and comparision charts with matplotlib to present region-wise performance

Projects

Fake profile detector by using ANN | Python |flask | html | CSS

Problems : To classify user profiles as real or fake using Artificial Neural Networks An artificial neural network (ANN) identifies fake profiles by first extracting relevant features from user data, such as account age and activity levels. The model is trained on labeled examples of real and fake profiles, learning to distinguish between them through backpropagation. Once trained, it can classify new profiles in real-time, adapting over time with new data to enhance accuracy. This approach leverages the ANN's ability to recognize complex patterns in data.

Online Grocery Application | HTML |CSS|JAVASCRIPT: Online grocery store FreshMart is a sleek online grocery platform designed for effectless shopping-from fresh produce to personal care. Its is designed using frontend.

Certificates

Microsoft certified : Azure AI fundamentals by Microsoft

Data structure : by Tech Augusta

Data analysis : by Deloitte

Responsive web design : by freecodeCamp
